STRATHMORE HARDWARE

VOL. V., NO. 43

LOCAL JOTTINGS

Miss Morrison and Master Morrison, Otokots, are visiting their sister, Mrs. Thos. E. Wright.

A son was born to Mr. and Mrs. A. N. Ray on Saturday morning.

The Presbyterian Ladies Aid held an ice-cream and pastry sale at Frohberger's store, opposite Maple Leaf Hotel, on August 10.

Dr. Wright, Dentist, will be in Strathmore August 12.

A.C.P.I.D. Camp under Mr. Geo Adams is at present engaged in putting in a drainage ditch along a canal one mile west of town. The job will probably occupy about three months. There are about 20 men in the camp.

Mr. Crandell, Gleichen met with a severe injury in July this year which put him out of action for some time. He is now able to be about again, but has to wear a special abdominal belt.

Yes, they do give you a 75¢ meal for 35¢, put up by a first class white chef, at the Maple Leaf Hotel.

Mrs. H. J. Anderson left on Wednesday on a month's visit to her old home, Killarney, Manitoba.

Mrs. Esther Johnston is at present on a month's visit to her parents, Mr. and Mrs. Alfred Johnston.

The programme that the Dominion Government has commenced in Southern Alberta this year under the direction of Mr. C. D. Waters, of Edmonton, with a view to reclamation, will form part of a permanent scheme of demonstration work, which should be of great value to farmers in the prairie provinces. An announcement that Lethbridge is to be the headquarters of the scheme was made recently in a general statement by Mr. Waters. It is understood that the facts are not stated in that report.

We have received notice from Mr. Stanley L. Jones, Calgary, of a general convention of the Liberals of Alberta which is to be held in Alton Tower, Edmonton, on Saturday next, day, August 5, at 3 p.m. It is hoped to have a good representation from every district in the Province.

Ladies stopping at the Maple Leaf will get all the courtesies possible shown there.

On Saturday Mr. R. B. Robson went up in a sample of irrigated barley grown on his estate, which was 3 to 3 inches high and almost ready to cut. With the continued warm weather it will not be long till the barley harvest starts.

The manager, chef, and all employees are white at the Maple Leaf Hotel.

The Ladies Rest Room at the U.F.A. yard is now open for the conveniences of ladies who can't afford to pay the regular Woman's rate, entitled to much credit for furniture, this room, which will undoubtedly be a great convenience for ladies during the distance, especially during the winter months.

Try the high-class wines, liquors and cigars, at the Maple Leaf Hotel, combined with the prompt service they are unequalled!

STRATHMORE, ALBERTA, JULY 29, 1914.

Subscription Price, 1.00 per year

Hail Adjusters Busy

Cricket to taking hold here. A number of farmers, Bow Valley Rural School Board, Concession, and strong remonstrance between Mr. Hall and Mr. XI, and eleven from C.P.I.D. The match will take place on the football ground.

Another week of dry, warm weather is bringing crops along rapidly, and some are already beginning to turn. Some of the farms would like a little more rain yet, as they consider the head will help to fill out the heads better.

Strathmore Sports Day

MEETING FRIDAY—EVERYBODY COME

To consider the holding of a sports day this fall is the purpose of a meeting to be held in the Town Hall Friday evening at 8 o'clock. It is proposed to make the sports this year on a glorious scale. For this the co-operation of all the citizens is required.

Everyone should therefore do the very best to turn out on Friday evening and get the hall started off rolling.

Complaint Outlawed

A case of a rather peculiar nature was heard before Justice Lambert and Vickery on Monday at the Court House. Tom, son of W. P. F. Vidal, residing near Dalyston was charged with having held an exhibition on his farm and in the meeting to the police authorities, and also with putting his own brand on the cattle which was his own property.

Mr. John Johnston informed the court that two years ago Vidal told him that he had picked up a calf on the prairie. A year or so after that he saw Vidal branding the animal.

Cross-examined by Mr. McKey, of Lethbridge, attorney, barrett of Mr. Jones and Company, representing Vidal, Johnston said that he could not remember the date of the branding, but thought it was in June.

Constable Hutchings, R.N.W.M.P. stated that Vidal had told him that he had picked up the calf on the prairie two or three years ago.

Mr. Mackay asked that the case be dismissed, as more than twelve months had elapsed between the alleged offence and the laying of the information.

The Magistrates agreed and the case was dismissed.

Weather Report

TUESDAY, JULY 21 TO JULY 27, INCLUSIVE.

	Min. Temp.	Max. Temp.	Precipitation
Tuesday	41.5	66.3	0.00
Wednesday	42.0	72.0	0.00

Quality First

The motto of the Strathmore Standard Job Printing Department. Cheapness does not pay when the work is poor.

We have adopted the standard of prices at which printers of Winnipeg sell their product. These prices have been compiled by scientific cost estimators, and are dedicated, as the foreword of the price list states, "to the man who is fair to Himself, his Customer and his Calling."

Our previous prices were based on a former Winnipeg price list, which was superseded this year by the present one, and our customers will find a number of alterations caused by variations of price of the raw material used in the printing industry.

Prompt service, good work, and quality material are the ideals we have always kept in mind, and we are constantly adding to our plant and stock to accomplish this.

Guesswork prices mean that one man gets a job for less than it is worth, while the other man is stuck for a big price in order to recoup the difference. Scientific price making is fair to everybody. It allows but a reasonable profit on every job.

Our prices and our product are right. Let us show you.

WEDNESDAY, JULY 29, 1914.

Henry Sorensen On Old World Conditions

SEE SUFFRAGETTES IN ACTION

Once upon a time it used to be the custom for easterners and people across the big pond to speak with bated breath of the "wild west" west, where the miners' everyday attire was complete without a handkerchief and the noble red man roamed about seeking whom he might devour.

Now, however, there are no savages. The west is as peaceful and law abiding as the interior of a church, and the scene of action has shifted to the文明的文明 world.

These reflections are prompted by a few remarks dropped by Mr. Henry Sorensen on Saturday. Mr. Sorensen had just returned from a trip to Europe, in which time he had visited Germany, France, and Spain, so that he knew whereabouts he speaks.

300 POLICE TO WOMEN

With a large contingent of President of Strathmore U.F.A.s, he had the opportunity of witnessing the celebrated set-to between the British and German police forces at the Olympic Games.

He said the spectacle of 300 police chasing 20 women was disgusting. He did not approve either of the actions of the German or English governments. They ought to be able to evolve some other means of dealing with the question.

HANG CARISON

Though Carison is in "Class A" as an aging officer, long constituting an all time, he did not approve of the actions of the Home Rule Bill.

He said when they said, "We're rested police, back up the railroads, cut the telephone wires, and run several boats," he would have been compelled to do so, but he would not stop at Strathmore to allow passengers to get off to entrap. This is as far as Mr. Carison would go in giving the matter further consideration.

It would not be good policy to make any recommendations in the matter until the result of the trial has been decided upon.—Yours truly,

John McCaul, Inspector of Railways Commission.

Calgary, July 14, 1914
Secretary-Treasurer, Town of Strathmore

Dear Sir, In connection with your service at Strathmore, and the stopping of trains Nos. 13 and 14 at that station, I have just had an interview with Mr. McLean, General Manager of the Canadian Pacific Railway Co., and Mr. McLean informs me that the matter of running Nos. 13 and 14 over the Guelph line will be definitely decided upon within the next two or three weeks. No train will stop at Strathmore to allow passengers to get off to entrap. We are still waiting for the decision of the Home Rule Bill.

On the other hand, we are still awaiting a word from the Canadian Pacific.

As regards the cause of the passing train among the laboring classes in England, he cited some figures published lately with regard to the amount of coal consumed in England. The total income of the country was 1,600,000,000 pounds sterling. Of this 1,000,000,000 went into the pockets of 10,000,000 people, less than 20 pounds per person per annum. Less than 20 pounds per person per year. This was sufficient cause for labor unrest, etc.

According to Mr. Carison, Mr. Sorensen said that the prosperity question in the West three years ago was at least as bad as the Home Rule Bill was in England. The English have adopted the methods now used by Carison and his followers what would be better for them. He thought the Government was quite right in the idea of the irrigation for letting them do what they had done.

The police force was at the bottom of the whole trouble of the suffragettes and the Irish.

One party was no better than the other. The Conservative party was equally bad. Liberal

would swear up something that the other kind to use sea weapon to put them on

the island for letting them do what they had done.

Finally, Henry said he was glad to be back in peaceful Alberta once more.

Permit me to add my hearty thanks.

Yours very truly,

John McCaul, Inspector of Railways Commission.

WHITE is hereby given that the White Cow, Limited, of Strathmore, Alberta, by unanimous vote have decided to wind up the company. The liquidator, Mr. W. H. May, of St. Marys, Ontario, has been appointed to receive claims against the company. The company must be sent to him by registered mail or hand delivery. Notice is hereby given that the company will not accept any claims not handed in within three months from the date of insertion of these notices (May 6) in this paper.

W. H. MAY, Liquidator

Farming De Luxe
(Continued from page 1.)

towns in the West, and is an industry which is of great benefit to the farmers of the district, as the market for a large amount of dairy produce raised in this district. Last month more than one hundred and sixty farms received cheques for production from the Dairy Farm during the previous month.

On Saturday the latest additions to the Farm were put into operation. These are two hand-some brick buildings, in one of which is located two steam boilers, and a electric power plant, while in the other is the new creamery equipment.

The Farm has now a water supply system consisting of a 4,000 gallon tank water tank. Also their own telephone system, electric lighting throughout, and electric power at every department where it is required.

THE POWERHOUSE

The floor measurement of the power house is 28 x 52 feet. The roof is a high one, necessitated by the height of the turbines, which take up the most of the space in the building. At the western end of the building is situated a turbo-generator of 50 horsepower, and a dynamo of 150 horse power. There is a force draft attachment to the furnaces and smokestack. The turbo-generator is at a standstill during production of power. A turbine-generator is a steam turbine direct coupled to an electric dynamo. This is one of the most modern forms of power development, and obviates any loss of power in transmission between the engine and dynamo.

In the meantime, there is also a steam battery for the gas lighting system when the dynamo is not running.

THE CREAMERY

is a building measuring 30 x 65. It is built of hollow blocks and interior is lined with glazed tiles for a height of four or five feet. The floor is lined with concrete, and there is a supply of steam from the powerhouse for pasteurising, washing bottles and equipment, etc. Everything is made so as to insure absolute cleanliness.

There is a large cream separator in the middle of the building, and when the cream is deposited it comes from the Company's rigs, or from the Company's own barn. This is a large vat system platform, where the cream is first poured. Down from the platform are two large pasteurizing vats, into which the cream goes after it passes from the first vat. Then a warm tube runs through each vat and steam is led through these till the cream is heated to a temperature of 100 degrees. Then the steam is turned off and a brine and ammonia mixture forced through the tubes, which reduces the temperature of the cream.

The cream is always pure, any gummy having been destroyed by the heat of the steam from boiler to cold. From here the cream passes to a bottling machine, where the bottles are filled and sealed and ready for market. There are several separators in the building for handling the product of the farm's own cows. On one side there is a steam washing plant, where equipment is sterilized in the process of production is sterilized.

The west end of the buildings is devoted to a cold storage and refrigerating plant. This consists of two rooms, insulated by a special lining and patent doors. The cold is produced and maintained by a mixture of ammonia and brine, forced through pipes at a high speed. There is a large pump driven by a motor which keeps the pipes to keep the freezing mixture in motion. The temperature in the refrigerating rooms can be reduced to zero if need be.

The contractors for the power equipment were Messrs. Richardson & Clark, for separators, cooling vats etc. Richardson & Clark, Co., St. Marys, Ontario, and for the cream separator and refrigerating plant, Engineering Works, Winnipeg.

The contractor for the buildings was Mr. Church, Calgary. NEW COWBARN

The old creamery is being torn down and the house in which Mr.

Eldred, poultry manager lives, has been moved to permit of work being started on the construction of a new cowbarn. This barn will accommodate 1,486 head, and will be completed in time for 1,200 cattle.

The floor and foundation will be of concrete, and the whole structure will be the most modern and up-to-date lines.

ENLARGED POULTRY PLANT

Work will be started within the next week on some big additions to the poultry plant. The scale on which the plant is to be enlarged will be judged from the fact that the Company figures on raising from 15,000 to 20,000 chickens per year, and poultry departments have had considerable success with incubators this year, the percentage being over 60% for chickens for each hundred.

HORSE BARN TO BE MOVED

It is proposed to move the horse barn into a new building with the entire stable if it can be obtained. At present the building is on a different angle from any of the other buildings, and squaring it around will have a general effect.

30,000 TREES

It is the purpose of the Company to plant 30,000 trees adjacent to the farm next spring, and to have a belt of trees planted in order to be headed to the Women's Institute for the furnishing of a rest room. It was decided to make the trees in the same style.

RAILWAY COMMISSION
TAKES ACTION

The president stated that he was informed as a result of the complaints made by Strathmore Union Railway Company that the Union Railway Commission had ordered the C.N.R. to refund their fares from Drumheller to Calgary. The announcement was cheerfully received by the passengers.

In the cattle department it is proposed to get some more Ayrshires and Friesians. The main breeders are Holsteins, which were introduced by Professor Elliott seven years ago, and which have given good satisfaction and contentment.

A turbo-generator is a steam turbine direct coupled to an electric dynamo. This is one of the most modern forms of power development, and obviates any loss of power in transmission between the engine and dynamo.

In the meantime, there is also a steam battery for the gas lighting system when the dynamo is not running.

THE CREAMERY

is a building measuring 30 x 65. It is built of hollow blocks, with an interior lined with glazed tiles for a height of four or five feet. The floor is lined with concrete, and there is a supply of steam from the powerhouse for pasteurising, washing bottles and equipment, etc. Everything is made so as to insure absolute cleanliness.

There is a large cream separator in the middle of the building, and when the cream is deposited it comes from the Company's rigs, or from the Company's own barn. This is a large vat system platform, where the cream is first poured. Down from the platform are two large pasteurizing vats, into which the cream goes after it passes from the first vat. Then a warm tube runs through each vat and steam is led through these till the cream is heated to a temperature of 100 degrees. Then the steam is turned off and a brine and ammonia mixture forced through the tubes, which reduces the temperature of the cream.

The cream is always pure, any gummy having been destroyed by the heat of the steam from boiler to cold. From here the cream passes to a bottling machine, where the bottles are filled and sealed and ready for market. There are several separators in the building for handling the product of the farm's own cows. On one side there is a steam washing plant, where equipment is sterilized in the process of production is sterilized.

The west end of the buildings is devoted to a cold storage and refrigerating plant. This consists of two rooms, insulated by a special lining and patent doors. The cold is produced and maintained by a mixture of ammonia and brine, forced through pipes at a high speed. There is a large pump driven by a motor which keeps the pipes to keep the freezing mixture in motion. The temperature in the refrigerating rooms can be reduced to zero if need be.

The contractors for the power equipment were Messrs. Richardson & Clark, for separators, cooling vats etc. Richardson & Clark, Co., St. Marys, Ontario, and for the cream separator and refrigerating plant, Engineering Works, Winnipeg.

The contractor for the buildings was Mr. Church, Calgary. NEW COWBARN

The old creamery is being torn down and the house in which Mr.

United Farmers Meet

**COMPLAINTS AGAINST C.N.R.
AND IRRIGATION AMENDMENTS UPHELD**

Strathmore, Alta.—A regular meeting in the Town Hall on Saturday afternoon. There was a large attendance, which was presided over by President Henry Sorenson, who was the first to speak in favor of a trial of a U.F.A. meeting since his recent return from Europe.

ROAD OPENING

The Union were of the opinion that the Municipal Council were making haste rather slowly in the operation of road north of the Demersville Farmhouse. The U.F.A. was passed calling for more strenuous measures.

Mr. Vickery was having the caravans across the town road under which irrigation ditch for the park passed, widened to the full width of the road.

SPORTS A SUCCESS

The financial statement of the recent sports showed that they had been a success, and a small profit realized. The money will be handed to the Women's Institute for the furnishing of a rest room. It was decided to make the room a public room.

**RAILWAY COMMISSION
TAKES ACTION**

The president stated that he was informed as a result of the complaints made by Strathmore Union Railway Company that the Union Railway Commission had ordered the C.N.R. to refund their fares from Drumheller to Calgary. The announcement was cheerfully received by the passengers.

In the cattle department it is proposed to get some more Ayrshires and Friesians. The main breeders are Holsteins, which were introduced by Professor Elliott seven years ago, and which have given good good satisfaction and contentment.

A turbo-generator is a steam turbine direct coupled to an electric dynamo. This is one of the most modern forms of power development, and obviates any loss of power in transmission between the engine and dynamo.

In the meantime, there is also a steam battery for the gas lighting system when the dynamo is not running.

HON. MR. FIELDING AND FREE IMPLEMENTS

What Liberal Finance Minister Said
In 1907—Anxious to Ensure Manufacture in Canada

In the course of the debate on the reduction of the duty on binders, mowers and reapers from 17½ per cent. to 12½ per cent., Mr. Fielding, Minister of Finance, called attention to the statement made by his predecessor, the Hon. W. S. Fielding in 1907, when a motion was introduced to put implements on the free list.

Mr. Fielding said at that time: "The belief is that if that motion were passed we could strike a severe blow to one of the great industries of the country. I believe the International Harvester Company would like to have its plant to expand up here in Hamilton, at least so much of it as is devoted to mowers and binders and have them made at the American branch and sent to the Canadian market in the States. The factory in Hamilton is an American concern. With a moderate duty we have induced American companies to come to Canada and to establish that great industry, and after we have brought it to an established it in Canada, I believe that if we were to pass this resolution it would compell us that that industry would find it profitable to close the Hamilton factory and bring in the goods which they make in the United States."

The freight rate from Chicago and vicinity, in which a great portion of the implements made in the United States for Canada are now made, adjacent to Minneapolis are made, averages 20 cents per hundred in carload lots from Chicago to Minneapolis. In contrast, the cost of implements for cash or credit in Winnipeg or points adjacent thereto, it should be borne in mind that the freight rates per hundred are 15 cents from Brandon, Manitoba, and 10 cents from carload lots to Winnipeg. When the price of implements in the Western States such as Montana, is compared with the price of implements in far West points in Canada, that is where the freight rates are equal, it is seen from the figures submitted by the Minister of Finance that the price is approximately the same in Canada as in the United States.

HOME MADE BRICKS

How Medicine Hat Board of Trade Bought For Home Products

The Medicine Hat Board of Trade a few weeks ago waited on the Board of Education with respect to the contract for bricks for a new school that is erecting. In addressing the Board, the president of the delegation spoke as follows:

"I would like to suggest that if possible you have the brick for the new school made here in town, or if that is impossible, buy them from a local manufacturer. We have a very bad impression people coming into the town and viewing the buildings when completed and saying: 'What a poor job! What brick here did you not?' and we have says people we sent to the States for it. It also keeps a lot of money in the town while the materials go to the other side of the world."

Mr. Hackvold, who is president, is ripe for an agitation for the selling of home products." Mr. Hackvold, chairman of the board reported that the reason for the difficulty in getting the brick was that it would be more expensive to buy them in men's bases. Andy Baxter duplicated this in his speech, adding three runs to the board's score, and this of this and of the sports went to the Nightingale ladies. The proceeds of this and of the sports went to the Nightingale Fund, which funds the price is approximately the same in Canada as in the United States.

Nightingale Sports Big Success

GOOD PROGRAMME, FINE WEATHER, AND LARGE ATTENDANCE

Nightingale's first annual sports, held on Saturday afternoon last, were an undoubted success in every way. The weather could not have been better. Spectators and competitors came from all over the district, and from as far away as Lethbridge, and some as could pile into the rigs, private and livery, and into local vehicles. There was not a room in town where there was not a crowd present. The horses racing well will continue to thrill the blood of the spectators. The foot races were also good, though they were of a special or amateur nature.

The bucking contest was somewhat of a disappointment, not because of any fault of the riders, but because the horses selected refused to buck.

The tug of war, Nightingale v. The World, was well received. Later, the baseball game between Strathmore v. Tudor, was a good one, Strathmore finally winning out by 10-7, after a hard game. The football match was also won by Strathmore after an exciting tussle.

The tug of war, Nightingale v. The World, was well received. Later, the baseball game between Strathmore v. Tudor, was a good one, Strathmore finally winning out by 10-7, after a hard game. The football match was also won by Strathmore after an exciting tussle.

An interested spectator of the day's doings was Mr. J. P. McArthur M.P., who came down from town.

The evening was spent by a very energetic dance, which continued till well on into the following morning.

The day's refreshments were served at moderate rates by the Nightingale ladies. The proceeds of this and of the sports went to the Nightingale Fund, which funds the price is approximately the same in Canada as in the United States.

Get Your Canadian Home from the Canadian Pacific

Wonderful fertile land is offered for sale by the Canadian Pacific Railway Company at prices ranging from \$11 to \$30 per acre. There is no better agricultural land than the virgin Canadian soil. It is unsurpassed for all forms of agriculture, including grain growing, stock raising, dairying, poultry culture, vegetable growing, and general mixed farming. The lands are convenient to railways and markets, and are located in a country of low taxation and delightful climate.

TWENTY YEARS TO PAY

Under the Company's new policy no land is sold to speculators only to those who will occupy and improve it. The terms of sale are most reasonable and the balance spread over twenty years with interest at six per cent, per annum.

ANSTALTATION TO FARMERS

Under certain conditions the Company will advance a loan of \$2000 to new settlers to be used in erecting a house and barn, and in getting started in farming. This loan is repayable on the same terms as the purchase price.
